

THE SPANTEK **EDGE**

**Cutting
Cost Thru
Innovation**

Design Application Consultation

- Review product application / Downstream processes
- Determine key customer requirements and product constraints

Pattern Optimization

- Material weight / strength / cost reduction
- Pattern engineering to provide least cost solution and best material utilization

Process Optimization

- Assure optimum manufacturing cost
- Manufacturing engineering to evaluate, improve and recommend process costs and automation

Secondary Operations

- Deliver semi-finished parts and components for assembly
- Stamping, Forming, Bending and Die Cutting
- Power Coating, Anodizing and E-Coating
- Part Fabrication (bending, drawing, forming, rolling, welding, and assembly)

Vendor Managed Inventory

Spantek's Inventory Management Programs are designed to meet your specific logistics requirements:

- Just in Time / Kanban / Consignment
- Vendor-Managed Inventory and Vendor Stocking Programs
- Reduces Your Total Cost To Market

Logistics

Minimize freight costs!

- Minnesota or North Carolina Manufacturing Plants
- Packaging / Freight / Handling / Storage

Lowest Price to Market

Improve Your Bottom Line!

- The Spantek Edge process
- Inventory Management
- Two Plants
