

SECURE-SPAN CLIPS

Secure-Span Security mesh by Spantek acts as an added level of security to protect vulnerable facilities from break-ins or security breaches. Secure-Span mesh is easily installed behind drywall by attaching to studs using Spantek's exclusive Secure-Span clips. Unlike other clips, Spantek's Secure-Span clips allow for the mesh to be installed with the diamonds running in either direction, providing more flexibility for installers and saving valuable time. Use Secure-Span inside your walls, ceilings, and floors to protect your most valued assets.

SECURE-SPAN CLIPS

Spantek's Secure-Span clips easily attach to metal and wood studs. The recessed center hole in the clips allows the fastener to seat comfortably inside the clip. The Secure-Span clips are packaged 300/box and are sold exclusively with the purchase of Secure-Span mesh. We recommend using 24 clips per 4' x 8' panel when 16" stud spacing applies.

SECURE-SPAN MESH

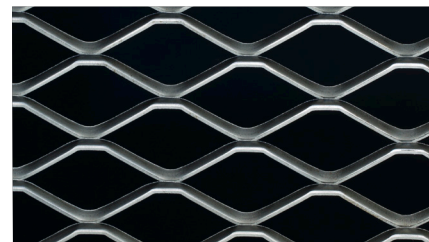

Spantek keeps several Secure-Span patterns in stock to accommodate minimum, medium and maximum-security applications. Call or email Spantek for a quick response to all your security mesh requirements.

MINIMUM SECURITY

Pattern	Material Gauge	SWD	LWD	Flat/Raised
1/2" #16	#16	0.500	1.2"	Flat
